

Specifications for Bath Sonicator

1. ULTRASONIC BATH with dual frequency of 25 & 45 kHz robust quality, with ergonomic design and innovative technology.
2. Bath Volume : 3.5 to 4 liters
3. Frequency : 25 & 45 kHz switchable
4. Additional Generator PCB cpl and Power potentiometer
5. Ultrasonic Power effective variable:100W
6. Temperature control : 30 - 80 °C
7. Protection class : IP 21
8. Material tank : Stainless steel – cavitation free
9. Material casing : Stainless steel
10. Lid : Stainless steel
11. Tank Inner dimension : 240 x 130 x 150 mm
12. Weight : Not more than 12 kg
13. Timer for ultrasonic activity, variable between 0 and 15 min. and permanent operation, degas mode for the efficient degassing of the liquid, sweep mode for the perfect sound field distribution and variable ultrasonic power setting.
